

Osborne 1 NG — lunchbox concept render

OSBORNE 1 NG — lunchbox concept

Form factor 2 (issue #52) · O1A blue/grey livery · keyboard seals the unit · up to 250 mm wide · about 80 mm thick

Design notes

- Power: USB-C PD trigger (15-20 V) to on-board +5 V / +12 V regulators; internal 4S 18650 pack optional; the original PSU (and its RIFA caps) retired.
- Livery: O1A blue/grey — grey ABS shell, blue accent stripe, white branding. Not the beige O1.
- Keyboard: Cherry MX implementation of the original matrix (#47); keypad omitted (it only duplicates the number row).
- Backpack mirrors the Compaq Portable III rear-expansion trick — bolt-on bay for a real 5.25-inch half-height drive.
